

100% Design announces heavyweight brands and exhibitors already confirmed for September 2018 show

New roster includes Benchmark, Established & Sons and Dare Studio among others

L-R Benchmark, Established & Sons

London, 11th July, 2018: **100% Design** has revealed updates to its exhibitor list for the 2018 show, confirming collaborations with world class brands and the biggest names in design. The show will cover four key areas: Interiors; Kitchens, Bathrooms & Bedrooms; Emerging Brands and, new for 2018, 100% Build London. The return of leading brands and debuts from emerging talent cement the show's position as a cornerstone event of the London Design Festival.

A powerhouse of British design, **Benchmark** makes timeless furniture that has soul and integrity. Using traditional craft techniques and innovative technology, each handmade piece effortlessly brings a sense of home to both commercial and residential spaces. On display will be new pieces by **Space Copenhagen** and **Foster + Partners**, alongside live workshops demonstrating the brand's signature craftsmanship. On the stand, Benchmark's craftsmen will be working at their benches producing furniture for live projects. One will be the Gleda Chair designed by **Space Copenhagen**, destined for the new hotel within Manhattan Loft Gardens, opening in early 2019; the other will be **Foster + Partners** OVO design for the Cleveland Clinic HQ in Ohio. Visitors will have the opportunity to follow the Benchmark hand-assembly process from start to finish, live each day.

Iconic British design brand **Established & Sons** returns to 100% Design with an exciting new collection of characterful furniture and lighting designs. New pieces include the Cassette sofa by **Ronan and Erwan Bouroullec**, the Barbican chaise by **Konstantin Grcic**, the Light Light by **Dimitri Böhler**, the Mauro Chair by **Mauro Pasquinelli** and the Filigrana Light by **Sebastian Wrong**. The new collection continues the brand's practice of supporting a dynamic selection of world-class creators and presenting imaginative products with style and personality.

L-R Dare Studio, Established & Sons

Known for their contemporary handcrafted furniture, award-winning British design brand **Dare Studio** returns to 100% Design. On show will be a selection of furniture and lighting products, suitable for both luxury domestic interiors and high specification contract environments. Notable products include: the Riley Coffee Table, a modern classic, which incorporates two tables of varying heights to add flexibility in positioning and function; and the Frida Chair, a modern interpretation of the wingback chair.

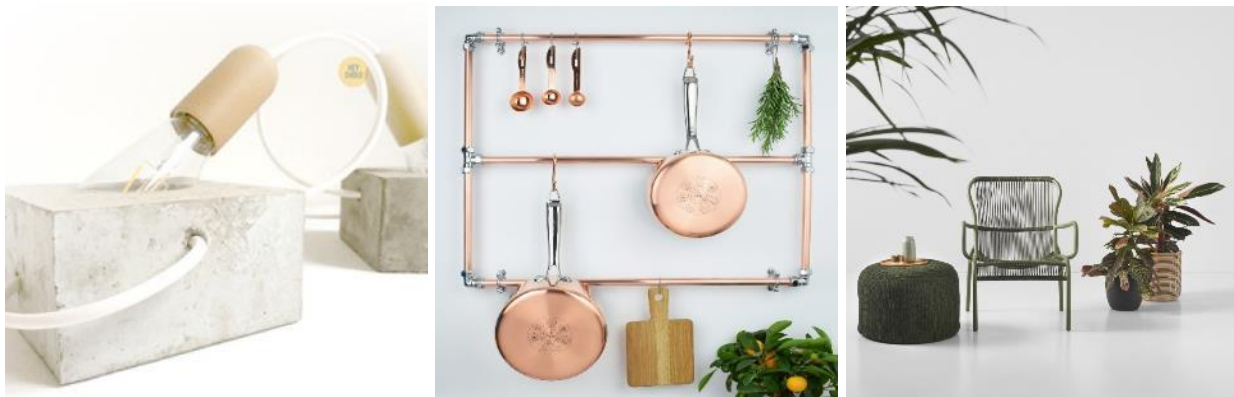

International design and lifestyle company **YOO** will be participating in this year's show; co-founded by **Philippe Starck** and **John Hitchcox**, the company names **Marcel Wanders**, **Kelly Hoppen**, **Jade Jagger**, **Mark Davison** and **Steve Leung** as Creative Directors. **YOO** is responsible for the regeneration of Olympia London and will be exhibiting the masterplan at 100% Design, with Heatherwick Studio, in collaboration with SPPARC Architects, leading the architectural enhancement.

100% Design is dedicated to showcasing a variety of brands from the UK and internationally, across each of the show areas. Brands to watch include Greek furniture brand **mono.rocks** which sources unique and exquisite stones from around the world and crafts them into artful interior pieces. The brand has relationships with the world's major quarries, enabling them to reserve pieces of stone that stand out. Designed with the core principles of simplicity and finesse, **Bulo's** pieces are understated with a timeless aesthetic. The Belgian brand creates quality furniture with collections that are recognisable for sleek lines and structured shapes. The fundamental idea behind the furniture from **Thors Design** is that of upcycling, using rustic Azobé wood, sourced from decommissioned Danish wharves. The result is bespoke, hand-made, sustainable furniture with an original raw look and a natural Nordic feel that retains the integrity, history and natural character of the wood.

L-R mono.rocks, Bulo, Thors Design

CHOLO.design produce handmade homeware accessories and lighting in natural materials such as bamboo and hemp. The Bristol-based team is dedicated to creating products with a positive impact on consumers and the environment. Cubo by CHOLO, a humble concrete lamp turned upside down, is hand made to order & incorporates an LED bulb and bamboo fitting. Founded in 2016, **Proper Copper Design** has grown to become the leading online retailer for handmade-to-order copper taps, showers, handles and accessories, shipping products from their Brighton-based workshop to customers across the globe. Trained as a carpenter, director Khan Erkeksoy recognised the potential for the material's industrial yet warm aesthetic while working alongside other trades. **Vincent Sheppard** has been designing and manufacturing exceptionally comfortable indoor and outdoor furniture since 1992. New items on show include the Loop Collection (pictured below) and the Roy cocoon; demonstrating simplicity with a modern edge.

L-R CHOLO.design, Proper Copper Design, Vincent Sheppard

Notes to Editors

The 100% Design Press Preview will take place on Wednesday 19 September and will be followed by the late night and party on Thursday 20 September.

Originally targeted towards the design industry in the UK, 100% Design was first staged in 1995. Today, the show attracts more than 27,000 visitors including architects, designers and interiors specialists.

Featuring an unrivalled talks programme, bespoke installations and a curated selection of world-leading international brands, 100% Design is the dedicated meeting place for design in London.

100% Design takes place across four days at Olympia London, from 19-22 September, concurrently to London Design Festival.
